

## PRESS RELEASE

---

Michelndorf, 04/12/2017

### **Successful AGRI FARM in-house exhibition**

On 1, 2 and 3 December 2017, the tillage equipment manufacturer AGRI FARM showed its comprehensive range of products at the in-house exhibition in Michelndorf.

Around 800 visitors from the federal states of Lower Austria, Upper Austria and Burgenland as well as from the neighbouring country Germany travelled to the 3-day in-house exhibition.

In addition to the proven product range of seedbed equipment, stubble-, intensive- and heavy cultivators, subsoilers, disc harrows, Cambridge rollers, field sprayers and viticulture implements, the customers were presented a special highlight:

The trailed stubble cultivator EURO CULT II with a working width of 10 metres and a total weight of 10,000 kg astonished many visitors due to its imposing appearance.

New in the AGRI FARM product range is the 5-row intensive cultivator EURO FLEX, which was also presented directly by the exhibition Agritechnica at the in-house exhibition. The device with the powerful spring tines is optimally suited for the incorporation of maize straw. Furthermore, the compact and heavy Cambridge roller HYDROROLLER was exhibited on the company premises in Michelndorf as a novelty.

During the exhibition, the AGRI FARM employees assisted the interested visitors with competent advice.

Many inspiring and informative discussions could be held with the interested parties in the marquee.

In frosty temperatures, the goulash and the mulled wine were enjoyed.

## About AGRI FARM Maschinenbau GesmbH

The family-run, medium-sized company AGRI FARM Maschinenbau GesmbH, founded in 1977 by engineer Franz Reiter, is a manufacturer of innovative agricultural tillage implements.

The extensive product range includes various types of cultivators, disc harrows, subsoilers, reconsolidation rollers, mulch shredders as well as crop protection equipment and viticulture devices.

100% Made in Austria – The devices are produced at the Michelndorf site in complete self-development and -production.

The second course of the LFS Tulln was impressed by the 10 metre stubble cultivator.

There were many interesting conversations with the visitors.
